

FULLY CONNECTED: Book Talks & Update

Updated: 17 May 2017

Since publication in April, I have been speaking a lot to invited audiences about connectedness and its discontents, from a *TedX* to *NESTA*, *The Financial Times*, *The Media Society*, *The Arts Club*, and the British Government-owned 'Nudge' Unit or *Behavioural Insight Team*.

In the Age of Overload the ways in which our personal lives tangle with technology are not always healthy. It is a problem for society as a whole, not just individuals.

Overleaf is my **calendar** of forthcoming public talks about Fully Connected May-November: I'll update as more are announced.

Some recent coverage:
